

New atlases and maps available to enable children to have accurate picture of the world.

Key vocabulary included on knowledge organisers and displayed in classrooms. Children are encouraged to use key vocabulary both orally and in their written work.

Opportunities given for cross-curricular work, including reading, writing and maths.

Produced an engaging and creative curriculum so that all children can become the geographers of the future.

Fieldwork opportunities across the school.

Opportunities for children to investigate their local area.

Progression documents used to enable prior learning gaps caused by COVID to be taken into consideration.

Children discover geography through investigation, thinking critically, asking questions, reflecting, debating and evaluating.

Growing together, hand in hand

**Geography at Gorsemoor**

**What does it look like?**

High quality resources and planning used to facilitate children's understanding.

Current world news shared with children, providing opportunities to learn about the wider world.

Knowledge organisers used to support children's learning and understanding.

Enrichment opportunities provided through special events, trips and visitors to school.

Curriculum designed to encourage children to make links to prior learning in previous terms, year groups and phases and across subjects.

Skill based lessons where children can clearly articulate what skills they are using building on previous learning.

Pupil Eco Team in place and a range of projects to be organised

'Dig deeps' used for retrieval practise and making links.
